# PAINT & PAPER RECOMMENDATIONS

SHERWIN WILLIAMS  
HIGH REFLECTIVE WHITE

[BLACK MARBLE WALLPAPER](#)

\$16.99 A ROLL

## PAINTING TIPS

- ✓ When rolling it is best to roll the full height of the wall and keep a wet edge, it helps to avoid a layer of uneven paint. As you finish one complete roll of the wall move over slightly as you do each stroke, covering the previous edge with the new edge.
- ✓ Taping skirtings that do not require painting, feature walls, window frames etc is a lot easier than trying to tackle those difficult edges freehand. When you have finished painting you simply just peel off the tape for a perfect edge.
- ✓ If you are painting trim such as baseboards (skirting boards), architraves etc, do these first, then the ceiling and finish up with the walls.
- ✓ If you have to fill in any cracks or areas where fixtures and fittings have been, do so and then perhaps before painting with the chosen colour, cover with a primer first.
- ✓ Ask your local store as to what type of brush is the most suitable for your job.

# MEASURING GUIDE

---

- Please keep all measurements within either feet or inches, or mm and cm, whatever works for you. But please try to avoid differing them.
- On a sheet of plain paper, sketch out your room layout. It does not have to be done with a ruler, as long as we can clearly identify what measurements belong to wall / item it will be fine.
- To start measure each wall from end to end to get the basic shape of the room.
- Next, we recommend you measure the ceiling height e.g., floor to ceiling. The reason why we ask this is so we can judge the length and shape of light fittings should your brief require them.
- Now let's measure the windows. This process involves measuring in from the edge of the wall to your first window opening. Take down the measurement.
- Now measure the width of the window itself including frame. Measure the depth. Now measure the depth from the floor to the base of the window. Then from the top of the window to the ceiling.
- Once you have measured all the windows do the same for the door(s), e.g., height, width, depth from ceiling to top of door.
- Now do the same for any wardrobes, alcoves, built-in furniture.
- If you have existing lighting e.g., sconces, wall lights that are to remain just measure and mark them with a key so we can recognize where they are and what you want to do with them.
- If you have any questions just drop us a line at [info@stylishinteriordesign.com](mailto:info@stylishinteriordesign.com)
